hinge axis

Depending on variant:

With standard under frame:

Remove front under frame panel (two screws, one on each bottom corner).

Drop-In:

Raise the unit at least 30cm from tabletop level in order to access the screws for the child guard.  
Be careful to support the unit such that no components or connections underneath the base of the unit are damaged while doing so.

### Step 1.

#### Remove Child guard:

*Refer service manual chapter replacement and adjustment*

- Remove front panel.
- Loosen mounting screws (3x depending on unit length) of child guard. *Screwed from underneath.*
- Remove child guard
- Position under beam on place of child guard
- Fasten mounting screws.

**CAUTION:**

Once past the top guide, the glass pane might fall if not properly held.  
Hence do not leave it standing upright without being supported by both guide rails or holding it.

HOT

COLD

**Step 2.**

- Remove side glass** both sides:
- Slide the double glass pane towards the front along the top (A) and bottom (B) guiding rails.
- The side pane can be removed from the unit once it has slid entirely past the top guide.
