#### Instruction.

1. Remove the cover profile complete with glas and seal.
2. Remove both side panels and the top plate of the rotisserie.
3. Disconnect the lamp wires from the connector
4. Cut the insulation as shown and take it out.
5. Remove the cover of the lamp
6. Remove the lampholder assembly.
7. Remove the reinforcement plate.

8. Place the large seal.
9. Place the new mounting bracket.
10. Mount the cover assembly with 4 nuts.
11. Put the insulation back in place and use aluminium tape to fixate it.
12. Connect the lamp wiring. Use a separate connection block for each wire.
13. Place one seal.
14. Make a composition of the cover profile, seal, spacer and glass as shown.
15. Slide this composition over the 10 studs and mount with 10 cap nuts
16. Place the tape on the indicated position. This is to prevent steam coming from the doors from settling above the lamps
